Summary

Full Stack Developer with 4.5+ years of experience building responsive, API-driven web applications for enterprise and client projects. Skilled in React.js, Node.js, Express.js and MongoDB with TypeScript, REST API integration, JWT-based authentication and authorization, API testing with Postman and CI/CD deployments on Vercel; working knowledge of AWS, SQL and Python. AI-assisted development with GitHub Copilot, ChatGPT, LangChain and MCP servers. Delivered client projects end to end, from development to production deployment.

Experience

BuildMeProduct **June 2024 – Present**

Full Stack Developer

- Leveraged Model Context Protocol (MCP) servers to integrate AI-powered development workflows with Figma, Playwright, and GitHub, using Figma MCP to analyze UI designs and accelerate responsive React components, and MCP debugging tools to inspect runtime errors, trace component behavior, and speed up root-cause analysis.
- Designed and managed MongoDB schemas and SQL database structures, implementing efficient queries, data relationships, indexing, and database operations to support application requirements.
- Designed, developed, and integrated RESTful APIs using Express.js, implementing modular routes, controllers, middleware, request validation, and seamless frontend-backend communication.
- Implemented API rate limiting, request throttling, and backend security mechanisms to control incoming traffic, prevent API abuse, and maintain service availability.
- Integrated AWS services for application infrastructure, backend hosting, storage, and deployment, supporting scalable and reliable application environments.
- Implemented end-to-end application workflows by integrating React frontend components with Node.js backend services, REST APIs, and MongoDB/SQL databases.
- Utilized AI-powered development tools including GitHub Copilot, Cursor, and OpenAI (ChatGPT) for React development, code optimization, debugging, and generating quality outputs using effective prompts, instructions, and constraints.
- Optimized full-stack application performance through Redis caching, database query optimization, Kafka-based asynchronous processing, and efficient API communication, improving application responsiveness and scalability.

Capgemini **Dec 2021 – May 2024**

Frontend Developer

- Integrated REST APIs using Axios to fetch, process, and display dynamic business data, handling loading and error states in the UI.
- Tested and debugged API integrations with Postman (API testing) to verify responses before connecting them to the UI.
- Developed and maintained frontend applications with React 16, JavaScript, HTML5, React Hooks, and Bootstrap; built reusable React components shared across screens, reducing duplicate code.
- Investigated and fixed UI bugs (layout, responsiveness, state-related issues) raised during testing and QA; worked in an Agile/Scrum team using Git/GitHub for branching and pull requests.

Projects

Dharmapeetam Website | dharmapeetam.com *Freelance*

React.js, Vite, Tailwind CSS, EmailJS, Google Sheets API

- Integrated EmailJS for a backend-free contact form and connected the Google Sheets API to fetch and update course card data, letting non-technical admins manage course content.
- Built reusable, maintainable UI components with Tailwind CSS for consistent, component-level styling.

Clinical Research Website | acrind.com *Freelance*

React.js, Vite, Styled Components, React Router, Bootstrap, Firebase Authentication, Firestore, EmailJS, Cloudinary

- Built an admin dashboard, dynamic course management, and certificate management with online certificate verification, using secure authentication and Firestore-backed data.
- Integrated EmailJS and Cloudinary for contact submissions and media management; implemented custom 404, SPA routing, and responsive, mobile-first UX.
- Deployed on Vercel with Git/GitHub feature-branch and pull-request workflow, CI/CD and environment variables; set up GoDaddy domain, DNS, and HTTPS/SSL for production.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Backend & APIs: Node.js, Express.js, REST API Design & Integration, Redis (Caching), Apache Kafka, Rate Limiting & Throttling, Load Balancing, JWT, OAuth 2.0, Firebase Authentication, Axios, Postman (API Testing), LangChain
Frontend: React.js, React Native, React Hooks, React Router, Redux Toolkit, Vite, Tailwind CSS, Bootstrap, Styled Components, Responsive Design, Performance Optimization
Databases & Cloud: MongoDB, Mongoose, SQL, Firestore, AWS, Vercel, Render, Heroku, DNS & HTTPS/SSL
AI-Assisted Engineering: GitHub Copilot, Cursor, ChatGPT (OpenAI), Prompt Engineering, MCP Servers, Figma MCP, Playwright, LangChain
Tools & Practices: Git, GitHub, Code Reviews, Agile/Scrum

Education

Gurunanak Institute of Technology, Hyderabad, India **June 2017 – August 2021**

Computer Science and Engineering | CGPA: 6.9

Certifications

Meta Front-End Developer | Meta Programming with JavaScript | Meta React Basics | Meta HTML & CSS in Depth
